## EDUCATION

---

### Georgia Institute of Technology – M.S. in Cybersecurity

Aug. 2025 – *Expected Aug. 2027*

Concentration: Information Security | GPA: 3.75

### George Mason University – B.S. in Information Technology

Aug. 2019 – May 2023

Concentration: Cybersecurity | Minor: Business | GPA: 3.8 | 7x Dean's List

## EXPERIENCE

---

### Cloud Security Engineer 2 | Humana | Remote - Arlington, VA

Jul. 2023 – Present

- Analyzed Humana's enterprise Azure and GCP cloud blueprints to identify configuration gaps and developed cloud-native security policies to translate security requirements into enforceable controls.
- Delivered the custom-built Humana Certified Registry (HCR) Container Security Analysis solution by implementing CI/CD pull-request scanning for Dockerfiles, Helm charts, and Kubernetes manifests to enforce approved-image governance and block noncompliant usage; secured 200+ enterprise applications and helped drive \$7.5M in annual savings, earning the 2026 Q1 CISO Award.
- Authored Terraform IaC and Azure DevOps CI/CD pipelines to provision Prisma Cloud resources and deploy policy-as-code changes through controlled promotion across environments.
- Implemented 150+ custom IaC security policy checks using Checkov and Prisma Cloud and integrated Prisma Cloud with Terraform Cloud to scan 4,000+ workspaces during plan runs, block pre-deployment misconfigurations, and provide actionable remediation guidance.
- Configured 100+ custom CSPM policies using RQL to detect cloud misconfigurations, strengthen compliance monitoring, and trigger CLI-based automated remediation.
- Managed Prisma Cloud IAM configurations, account groups, integrations, alert rules, and daily platform operations to optimize posture and streamline administration.
- Implemented Cloud Workload Protection (CWP) runtime, vulnerability, and compliance policies to establish consistent container security baselines across environments.
- Developed Python and shell scripts to automate various operational and security use cases, including identifying unprotected Kubernetes clusters, onboarding and organizing cloud assets, and supporting remediation activities.
- Integrated Prisma Cloud security and operational data, including CSPM alerts, IaC policy violations, audit and incident logs, and container image-scan results, with Splunk to centralize logging and develop reports and dashboards for monitoring, analysis, trend tracking, and remediation.
- Placed 4th out of 30 security teams in the 2026 EIP AI Hackathon by building an AI-driven vulnerability-prioritization agent that analyzed security findings, correlated risk signals, and identified critical issues for remediation.
- Earned 2 STAR Awards for contributions to key cloud-security initiatives and significant process improvements that strengthened Humana's multi-cloud environment.
- Mentored college interns and onboarded new engineers on cloud security standards, practices, and tooling.

### Cloud Security Engineer Intern | Humana | Remote - Arlington, VA

Aug. 2022 – Jun. 2023

- Designed, implemented, and tested Azure security policies aligned with Humana Enterprise Standards to improve compliance across Azure services.
- Authored use-case documentation to ensure effective policy enforcement and operational readiness.
- Contributed to the Enterprise Azure Tagging Standards initiative by enforcing required tags through Azure Policy and remediation tasks that increased tag coverage across Humana's Azure tenant.
- Streamlined CI/CD pipelines by converting inline scripts into reusable PowerShell modules with standardized paths to improve readability and maintainability.
- Standardized the team's DevOps processes by developing a comprehensive guidebook covering branching strategy, commit hygiene, PR reviews, code ownership, and source control workflows.

- Partnered with engineers and stakeholders through agile delivery to deploy security policies and DevOps improvements into production.

#### **Site Reliability Engineer Intern | Humana | Remote**

May 2022 – Aug. 2022

- Standardized observability across Humana-approved Azure cloud capabilities by producing SRE KB articles that defined observability requirements and monitoring and logging standards for Humana's Cloud 3.0 platform.
- Provided DevOps and application teams with guidance to implement OpEx and SRE requirements within their applications to support successful Day 2 operations.
- Reduced the overall time SRE, DevOps, and application teams spent locating accurate information by 5-6 hours per week.
- Placed 1st out of seven teams in the 2022 Humana IT Intern Hackathon by collaborating on a UI/UX redesign of the LADDER employee-recognition badge-sharing site, introducing profile, progress-tracking, filtering, and gamification features.
- Placed 1st in the 2022 Humana IT Intern Olympics as part of a team-based competition.
- Received the Best Team Player intern superlative award for collaboration, active participation, and dedication to team success.

#### **Data Analyst Intern | Enterprise Hall | Remote**

May 2021 – Aug. 2021

- Performed data normalization to minimize redundancy and align datasets with organizational standards to enable accurate querying and analysis.
- Analyzed operational data with pivot tables and charts and communicated those insights to decision-makers.
- Designed and developed a web-based intake form and landing page to improve data capture quality and consistency.
- Received distinguished recognition for exceptional achievement and performance during the program.

#### **Tech Consultant & Fulfillment Operations Expert | Target | Merrifield, VA**

Jul. 2019 – Jan. 2023

- Supported consumer technology sales and troubleshooting, including device setup, activations, data transfers, warranty/return support, and POS/CRM documentation to improve first-contact resolution.
- Used handheld scanners and the store WMS to coordinate inventory flow and led daily Pick, Pack, and OPU operations by prioritizing workloads, delegating tasks, and resolving issues to meet service levels and goals.
- Trained 3-8 new team members per quarter using clear SOP handoffs and on-floor coaching to accelerate ramp-up and improve team performance.
- Consistently ranked on Top 5 Weekly Leaderboards for Pick, Pack, INF, and OPU within an 80+ person department; averaged 78 UPH for picking, 330 UPH for packing, and a 4.5% INF rate.
- Processed 40,000+ units in 2021 while working part-time, ranking among the top 10 employees in the district for annual fulfillment volume.
- Earned 2 Performance Awards and the highest annual evaluation rating of Exceptional in both 2020 & 2021.

### **SKILLS & CERTIFICATIONS**

---

- **Technical:** Python | SQL | Terraform | SPL | YAML | JSON | Shell Scripting | Git | REST APIs | CI/CD
- **Tools:** Microsoft Azure | Google Cloud Platform | AWS | Prisma Cloud (CSPM, IaC, CWP) | Azure DevOps | GitHub | Visual Studio Code | Postman | Terraform Cloud | ServiceNow | Splunk | Kali Linux | Microsoft Office Suite | Conda | Checkov | Cloud Shell | Docker | TwistCLI | Wiz | Checkmarx
- **Certifications:** Prisma Certified Cloud Security Engineer | Splunk Core Certified User | CompTIA CySA+ | Microsoft Azure Administrator Associate | CompTIA Security+ | ISC2 Certified in Cybersecurity | AWS Certified Cloud Practitioner | Microsoft Azure Fundamentals | Terraform Associate | Microsoft Data Fundamentals | Microsoft Security, Compliance, and Identity Fundamentals
